Clothes Drying Tip

Separating towels & heavier cottons from the lighter weight clothes can help your clothes dry faster & more evenly. When possible hang clothes outside to dry as this maintains their shape & also saves energy.

Know The Ideal Grass Length!

Lawnmowers have adjustable heights for a reason. There may be times, such as the start of the grass cutting season, when your lawn is particularly long, in this instance a higher cutting height would be useful for the first cut. During the Summer you should aim for grass between 2-5cm.
